Art Unit: 1714

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

At lines 5 and 6 of the claim, the phrase "selected from the group consisting of is repeated twice".

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Canadian Patent No. 2,300,218.

5. The Canadian patent discloses blends of an aromatic polycarbonate and/or a polyester carbonate, a graft polymer having applicant's claimed proportions and properties an optional thermoplastic copolymer and up to two phosphorous compounds having the same structure as those of applicant's claims. Because all of the claimed components set forth in applicant's invention are disclosed by the Canadian Patent, no patentable difference is readily ascertained.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1714

6. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Canadian Patent No. 2,300,218 as applied to claims 1-13 above.

7. The Canadian Patent additionally comprises a fluorinated polyolefin. PTFE is a well known anti-drip agent in this art. Omission of such a fluorinated polyolefin along with its concurrent function would have been obvious to one of ordinary skill in the art at the time of applicant's invention. The term "comprising", used in applicant's claims, allows for the inclusion of components that do not materially effect the composition. The inclusion of a fluorinated polyolefin is not precluded by applicant's claim language.
